

WE NEED YOUR HELP STOPPING THIS LAND GRAB

This is an
unprecedented
fleecing of our
property rights.

DEAR FELLOW AMERICAN

The Biden Administration is quietly fast tracking a devious scheme for wall street investors to acquire the rights to our lands!

On October 4, 2023, the Securities Exchange Commission issued a proposed rule to approve listing "Natural Asset Companies (NACs)" on the New York Stock Exchange. They did this quietly. Not one press release was issued by any of the players.

If this rule is approved, it will allow investors such as Blackrock, Bill Gates, and possibly even China to hold the ecosystem rights to the land, water, air, and natural processes of the properties enrolled in NACs — including our National Parks!

NACs are the way elite investors plan to profit from the protected lands created by Biden's 30x30 agenda - the permanent protection of at least 30 percent of our land and oceans by 2030.

While they have been driving middle class American's off their land, they have also been positioning themselves for total political and financial control of our natural resources. We need your help to stop this!

**Sincerely,
Margaret Byfield**

6 KEY THINGS YOU NEED TO KNOW ABOUT NATURAL ASSETS

- 1** Natural Asset Companies will own rights to traditional assets such as land and water, as well as **the rights to a new set of arbitrarily valued “natural processes.”** These processes are clean air and other natural functions no one has a right to own, and are essential for us to live. Creating a value for these creates market distortions, **potentially wrecking our economy!**
- 2** **The assets to be enrolled in the NACs include federally owned lands!** Our National Parks, National Wildlife Refuges, National Monuments, Wilderness Areas, and the Bureau of Land Management lands placed in conservation status will become assets for private profiteers.
- 3** Conservation easements on private lands will also be enrolled. These easements are owned by a land trust or government and **can be listed without the landowner’s consent!**
- 4** **The NAC will have “management authority” over all the assets.** This includes the federal lands, private lands, conservation easements, and all other assets.
- 5** The NAC must ensure these assets are “sustainably managed,” prohibiting any use of the resources that are not regenerative. **No mining, oil and gas, or any other activity that can be arbitrarily defined as “unsustainable.”**
- 6** There appears to be no prohibition on foreign investment into the NAC. **Adversarial countries, such as China,** may be able to own shares in these companies, jeopardizing national security!

We must stop the approval of Natural Asset Companies if we are to save our land and liberty.
